

More than *you think.*

Campaign presentation

The idea, every first-window post, production timing and investment.

IN THIS DECK

01 THE IDEA

02 THE CONTENT

03 THE TIMING

04 THE COST

More than you think.

The campaign names an assumption, then breaks it with real people, real work and a clear route in.

01

THE COMPANY

More than a builder

Design, manufacturing and engineering sit behind what appears on site.

"You think construction starts on site. It starts long before that."

02

THE ROLES

More than hard hats

Four priority roles shown through the decisions, tools and tasks they actually own.

"My job is invisible when the building works."

03

THE ROUTE

More than one way in

Apprenticeship, graduate and school-leaver paths explained without jargon.

"A degree without the debt. Here is what that looks like year by year."

EXECUTION RULE

Name the assumption. Break it with proof. Day in the life leads; routes and application guidance help people act.

Exactly what we are making

No inflated count. Crops and platform versions are delivery, not new creative ideas.

THE CREATIVE MIX	
FLAGSHIP	One campaign film
ROLE FILMS	Building services, structural engineering, design management, procurement
DAY IN THE LIFE	Site and office profiles
APPLICATION	Results, routes, criteria, answers, process and deadline
NAMED VOICES	Early Talent lead and one employee

HWL leads strategy, creative direction, production, copy, design briefs and final QA. LOR provides people, access, facts, approvals and publishing.

Results, routes and application quality

ID / DATE	POST	FORMAT + CHANNELS	WHAT PEOPLE WILL SEE
P01 13 AUG	A-level results: what are your options? “Got your results? Here are three routes you could take next.” HWL + LOR	7-slide results-day carousel LinkedIn • Instagram • Facebook	A calm guide to graduate, degree-apprenticeship and school-leaver routes. What each route suits, what to do if grades differ from the plan, and where to explore open roles.
P02 20 AUG	GCSE results: your next two years “You do not need a ten-year plan. Start with the next step.” HWL + LOR	7-slide route-map carousel LinkedIn • Instagram • Facebook	Shows A-level, T-level, college and apprenticeship options from 16, then how each can lead into LOR. Written for students and parents.
P03 27 AUG	Inside a degree apprenticeship “What does the route actually look like, year by year?” HWL + LOR	8-slide swipe-through carousel LinkedIn • Instagram • Facebook	One slide per stage: work, study, salary, fees, qualifications, milestones and progression. Ends with one honest trade-off and a clear link. All figures require LOR approval.
P04 31 AUG	Quality over quantity “We are looking for evidence, not identical answers.” HWL + LOR	Ghostwritten LinkedIn post Early Talent lead's personal profile	A first-person post explaining why specific examples, real motivation and considered role choice matter more than generic enthusiasm. Drafted by HWL, approved and published by LOR.
P05 2 SEP	What makes an application stand out? “Six things that make an application easier to understand.” HWL + LOR	7-slide application carousel LinkedIn • Instagram	Six broad qualities LOR values, translated into plain language: curiosity, evidence, teamwork, ownership, learning and role-specific motivation. No private scoring criteria disclosed.
P06 7 SEP	Advice from an Early Talent assessor “What makes a strong early-careers application?” HWL + LOR	45–60 sec advice video LinkedIn • Instagram	A named assessor shares one positive signal, one common missed opportunity and one practical preparation tip. Broad advice only, with no questions, scores or candidate examples disclosed.

Application help, launch and first role films

ID / DATE	POST	FORMAT + CHANNELS	WHAT PEOPLE WILL SEE
P07 9 SEP	Make your answer more specific “A stronger answer in three simple steps.” HWL + LOR	6-slide worked-example carousel LinkedIn • Instagram	Uses a fictional, non-assessment example. Starts with “I work well in a team”, then adds the situation, action, result and learning. The final slide gives a reusable answer structure.
P08 14 SEP	Which of these four roles sounds like you? “Four roles. Four different kinds of problem to solve.” HWL + LOR	6-slide role-finder carousel LinkedIn • Instagram • Facebook	Cover, one slide per priority role, then a final route slide. Each role explains what you work on, one decision you might make, who it may suit and where to apply.
P09 16 SEP	What happens after you apply? “The application journey, step by step.” HWL + LOR	7-slide process carousel LinkedIn • Instagram	Application, screening, assessment, interview, decision and response. Sets expectations without promising exact timings until LOR confirms them.
P10 21 SEP	Campaign hero film: The Relay “One project. Four roles. Every decision moves the work forward.” HWL + LOR	75–90 sec hero film LinkedIn • Instagram • YouTube	The main film, captured across both shoot days. One live project passes through four roles. Each person shows the task they own and the handoff they make. If the chain is not real, the fallback is four connected decisions on the same project.
P11 22 SEP	Building services “The work you only notice when it goes wrong.” HWL + LOR	30–45 sec role-explainer video LinkedIn • Instagram	Follow one real decision from model or screen to its impact on site. Show the tool, the people involved, what success looks like and where the role can lead.
P12 24 SEP	Structural engineering “The checks that let work continue.” HWL + LOR	30–45 sec role-explainer video LinkedIn • Instagram	Follow one genuine drawing review, calculation, check or sign-off. The engineer explains what they are checking, why it matters and what the site can do next.

Role films, employee voice and deadline

ID / DATE	POST	FORMAT + CHANNELS	WHAT PEOPLE WILL SEE
P13 28 SEP	Design management “I found the problem before site did.” HWL + LOR	30–45 sec role-explainer video LinkedIn • Instagram	A real, approved clash, version issue or coordination problem. Show how the design manager spots it, brings the right people together and avoids delay or rework.
P14 30 SEP	Procurement “Site needed it in October. I decided in April.” HWL + LOR	30–45 sec role-explainer video LinkedIn • Instagram	Follow one real package from brief to supplier choice. Explain the trade-offs between cost, quality, lead time and certainty, then show why the decision matters on site.
P15 2 OCT	The employee’s own story “I nearly did not apply because I could not picture the job.” HWL + LOR	Ghostwritten LinkedIn post Employee’s personal profile	Their misconception, what changed their mind, what the role actually looks like and the advice they would give someone considering it. Drafted by HWL in their voice, approved by them and LOR.
P16 5 OCT	Day in the life: Site “6:58am. This is the decision I own today.” HWL + LOR	60–90 sec day-in-the-life film LinkedIn • Instagram • YouTube	Arrival, one real task, one decision, a colleague interaction, one problem and an honest reflection on the route and progression. The site hero profile.
P17 8 OCT	Day in the life: Office “My job is invisible when the building works.” HWL + LOR	60–90 sec day-in-the-life film LinkedIn • Instagram • YouTube	Arrival, coffee, one live tool or model, a meeting, one decision and the connection back to site. Building services preferred, using the strongest office voice.
P18 T–10 DAYS	Application deadline checklist “Applying this week? Check these five things first.” HWL + LOR	5-slide checklist carousel LinkedIn • Instagram • Facebook	Correct role and route, clear evidence examples, accurate details, any required documents and the final deadline. Ends on the named application link and support or adjustment route.

Six ideas to bank, not add to scope

ID / USE	OPTIONAL IDEA	FORMAT + CHANNELS	WHAT IT WOULD ADD
A01 ROLE SWAP	What's on my screen? "Here is the tool I use and the decision it helps me make." OPTIONAL • SWAP ONLY	20–30 sec screen walkthrough LinkedIn • Instagram	A named employee narrates one approved model, drawing or tracker. Best used when a role needs more technical clarity than the main film can hold.
A02 LOW-LIFT	The decision I made this week "One decision. What changed because of it." OPTIONAL • SWAP ONLY	20–30 sec employee video LinkedIn • Instagram	A quick pickup from strong talent: the decision, who it affected and what happened next. Useful if one planned role film is weaker on the day.
A03 ROLE SWAP	Myth, meet the job "What people think I do. What I actually do." OPTIONAL • SWAP ONLY	6-slide carousel or 20 sec reel LinkedIn • Instagram • Facebook	A plain-English myth-buster for the least understood role. Especially useful for building services, and for the parent audience on Facebook.
A04 SHOOT PICKUP	What surprised me most "I expected one thing. The reality was different." OPTIONAL • SWAP ONLY	30–45 sec employee montage LinkedIn • Instagram	Three or four short answers from grads and apprentices. Efficient to capture on either shoot day and strong if the individual stories are honest.
A05 ROLE SWAP	One tool, one role "Four tools that make four different jobs visible." OPTIONAL • SWAP ONLY	4-part vertical series LinkedIn • Instagram	A model, drawing, procurement tracker and site check become four short explainers. An alternate treatment for P11 to P14 if the tasks are more visual than the interviews.
A06 LATE WINDOW	Ask an apprentice "The question I wish I had asked before applying." OPTIONAL • SWAP ONLY	30–45 sec Q&A video LinkedIn • Instagram • Facebook	One real candidate question answered by a current apprentice or graduate. Best held for the deadline window or used when a particularly strong voice emerges.

Three ways to schedule the same first-window scope

The recommendation is to bank both shoot days in August. The £14,000 scope does not change between options.

A

FRONT-LOADED

RECOMMENDED

SITE • W/C 3 AUG
DARTFORD • W/C 10 AUG

Both shoots complete before the main edit run. All four role films can launch on time.

Largest review buffer. Lowest delivery risk.

B

STAGGERED

WORKABLE

SITE • W/C 3 AUG
DARTFORD • W/C 24 AUG

More time to cast the office roles and clear project material.

Smaller edit buffer. Office films move closer to launch.

C

PHASED

NOT PREFERRED

SITE • AUGUST
DARTFORD • AFTER 21 SEP

Easier logistics if Dartford access cannot land in August.

Role films miss the opening moment. The campaign launches with less proof.

OUR RECOMMENDATION

Option A. Protect the quality of the role films by protecting the edit and review time.

From sign-off to launch

Option A gives the creative enough time to be made, reviewed and adapted properly.

16-31 JUL	LOCK	Site, Dartford dates, talent, permissions, facts and application links.	14-16 SEP	WARM UP	Role teaser, application process and one-week-to-open content.
W/C 3 AUG	SHOOT 1	Live site. Structural engineering, site day in the life and flagship proof.	21 SEP	LAUNCH	Applications open. Flagship film goes live.
W/C 10 AUG	SHOOT 2	Dartford. Building services, design management, procurement and assessor.	22 SEP-8 OCT	SUSTAIN	Four role films, two day-in-the-life profiles and named employee post.
13 + 20 AUG	PUBLISH	Results-day posts go live while the main films are in edit.	T-10 DAYS	CONVERT	Deadline checklist and final application path.
17 AUG-11 SEP	MAKE	Edit video masters, build designed posts, clear facts and cut platform versions.			

Each day is tied to named posts

We leave with proof for the edit, not generic coverage.

SHOOT DAY 1

LIVE SITE

P10 · P12 · P16

PEOPLE

STRUCTURAL LEAD
SITE DAY-IN-THE-LIFE LEAD

CAPTURE

A real check or sign-off. One owned task. One decision. The tool, drawing or document that proves it. Arrival, team, portraits and action.

The structural post must show the actual check or sign-off. Walking B-roll cannot replace it.

SHOOT DAY 2

DARTFORD OFFICE

P06 · P10 · P11 · P13 · P14 · P17

PEOPLE

BUILDING SERVICES
DESIGN MANAGEMENT
PROCUREMENT
NAMED ASSESSOR

CAPTURE

One real screen, package, model or process per role. One decision from that week and its site consequence. Assessor criteria and one approved question.

Building services stays protected. It is the least understood role and the hardest to fill.

Commission one window at a time

Each later window is decided with data from the one before it.

01

LAUNCH WINDOW

£14,000

JULY TO OCTOBER

Two August shoot days, P01–P18, campaign toolkit, platform exports and launch reporting.

COMMISSION NOW

02

LAUNCH + COHORT

£21,000

JULY TO DECEMBER

Everything above, plus the New Cohort shoot, First Fortnight film, myth and Q&A cuts, November sustain and mid-campaign report.

DECIDE AFTER LAUNCH

03

FULL CAMPAIGN

£28,000

JULY TO MARCH

Everything above, plus the trades shoot, National Apprenticeship Week, February push, wrap report and 2027 evergreen handover.

DECIDE IN DECEMBER

EXCLUSIONS

VAT. Travel at cost. Paid media £3,000–£5,000 paid directly by LOR. Internal line-manager training pack £1,750, scoped separately.

What we need from LOR

Six locks turn this deck into production.

01

SCOPE

Confirm £14k launch window, £21k through December or £28k full campaign.

02

TIMING

Choose front-loaded, staggered or phased shoot timing. We recommend front-loaded.

03

DATES + ACCESS

Name the live site, confirm Dartford access and lock both August dates.

04

PEOPLE

Confirm four role voices, one assessor and the strongest site and office day-in-the-life leads.

05

FACTS

Clear application volume, entry routes, salary/progression, assessment criteria and process timings.

06

CONVERSION

Provide the named role links, application opening date and closing date.

ONCE THESE SIX ITEMS ARE LOCKED, PRE-PRODUCTION STARTS.
